

## AI Integration Feature

### Task Screen

- allows the user to generate subtasks related to the tasks
- (If possible, user should also be allowed to have second subtasks out of first subtask, parang hierarchy po)

- Parang ganto sa picture (If pasok pa sa pinagusapan natin price huhu)

### Smart Note Screen (yung may bold po dito sa baba yung gusto namin makita na buttons sa smart note)

- When the user creates a note, they use AI to
  - Summarize the note (**Summarize this**)
    - Create short summaries
    - Generate bullet-point summaries
    - State its key take-aways
  - Expand the note (**Make this longer**)
    - Turn brief notes into detailed paragraph
  - Rewrite / transform the notes
    - Make the note casual (**Make this more casual**)
    - Make the note formal (**Make this more formal**)
    - Make the note more professional (**Make this more professional**)
  - Fix Grammar (**Fix my grammar**)
    - Fix note's grammar / spelling errors
    - Reorganize the flow of the note
- The user should also be able to have a retry button (para mag generate ulit / para may option)
